

PERSONAL TRANSPORT VEHICLE

The perfect answer for commuters

The (PTV) Personal Transport Vehicle offers maneuverability, power, speed and style in a small compact portable human transporter built with the latest in advanced high technology design and performance.

Used for: Police, Airport Security, Mall Security, Warehouse Travel , Special Needs Mobility

The PTV offers the rider a comfortable, safe riding experience in an upright position on a platform capable of supporting up to 350 lbs. Excellent for commercial use, at a price point that is a fraction of other well know human transport vehicles.

Our revolutionary new technology includes two (2) Powerful 500 Watt Motors which are built into the hubs of each front wheel while providing a specialized dual wheel control system, while riding on a 4 wheel stable platform providing better safety features and more control than other human transport vehicles.

The PTV is energized by 3 rechargeable 12 Volt Batteries providing 36 Volts of power.

Specifications:

Folding Handle for Placing in Car Trunk:
Regenerative Braking System with Dual Disk Brakes & Rear Brake Lights

Motors Two 500 Watt Motors one in each Wheel HUB

Battery 36 Volt 12AH Lead Acid

Max Speed 12 MPH

Range per Full Charge: 20 Miles

Tires (Front & Rear): 16" Air Filled 3.5" Wide & 6" Solid Rear Tires

Deck: All Steel Reinforced Deck w/ Full Rubber Pad & High-Impact Plastic

Frame: High-Tensile Steel

Net Weight: 110 Lbs.

Max Load: 350 Lbs
